*Allowable Subject Matter*

Claims 1, 2, and 6-9 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or render obvious a process, as called for in claims 1 and 7, in which the dehydrogenation of n-butane to butadiene comprises steps (B1) and (B2). In step (B1), there is the presence of oxygen and a Pt and/or Pd catalyst. The prior art of record does not disclose or render obvious a process, as called for in claim 8, in which styrene are produced by jointly dehydrogenating butane and 4-vinylcyclohexene in the presence of oxygen to give a product stream comprising styrene, butadiene, and others. After separating styrene, the remaining containing butadiene and other is fed into a dimerization zone to dimerized butadiene to 4-vinylcyclohexene which is used for the dehydrogenation step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
